

SDI Editor APS[®] (Now with Movie & PowerPoint O/P)

Editing and composition tool for MS Windows

www.sdicgm.com

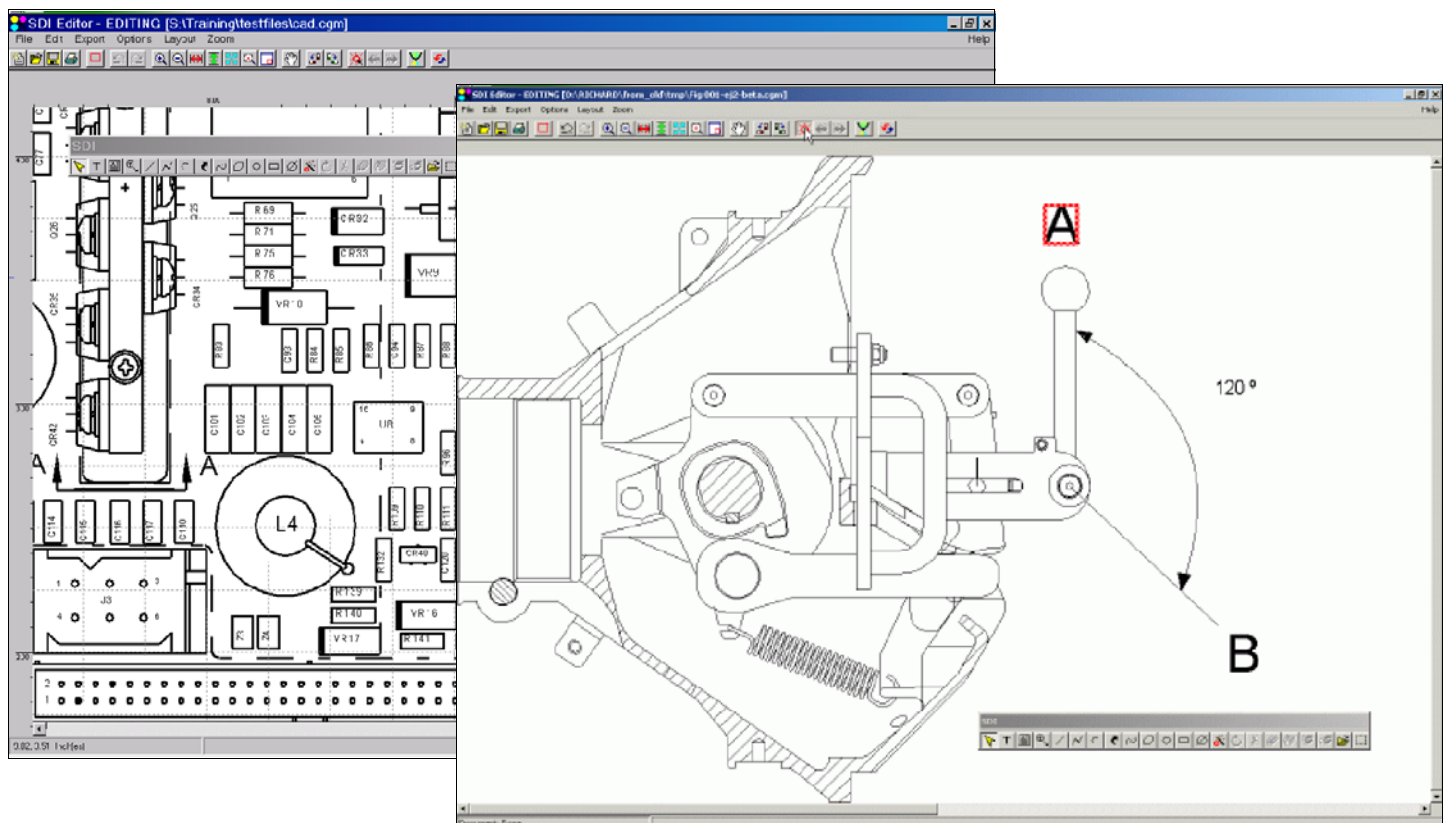

SDI CAD Editor is the one-stop graphics tool for anyone who uses the CGM format or any other standard 2D graphics. This editing and composition utility enables you quickly and easily to create the graphics presentations to get your message over. The graphical output from a number of sources can be combined into one comprehensive presentation, plus the facility to annotate or modify any of the graphical elements.

- **View, edit, montage, mark-up, lay-out, hotspot & Print CGM files.**
- **CAD applications: use CGM files from UGS NX and I-DEAS, CATIA, Pro-E, and others to mark-up, lay-out and hotspot drawings.**
- **Technical publishing for manuals, plans, assemblies, etc.**
- **Compatible with binary CGM files: V1 - V4, ATA and WebCGM.**

Some of the functions SDI CAD Editor offers:

- View/import CGM, DWG/DXF, BMP, CALS, EMF, HPGL, ICO, JPEG, PDF, PNG, GIF, PostScript, TIFF and XWD files
- Create drawing area to append images
- Re-size drawing area
- Save templates to save work in progress or to set-up styles
- Add and edit text, lines, polygons, symbols
- Supports solid, hatch and pattern fills
- Show, create and modify hot spots/hyperlinks
- Group editing
- Place leader lines
- Zoom control - detailed view - overview - pan mode
- Level control: move up a level, move back a level, move to front, move to back
- Crop - horizontal cut line - vertical cut line
- Layer Management
- Delete, move, rotate, resize elements
- Set measurements in inches or millimetres
- Grid control - snap to grid
- Overview window permits navigation when zoomed in
- Line type: colour, line style, thickness, ends
- Text: standard text, boxed text, font, colour, size, angle, style
- Bezier lines, polylines, arcs, sweep arrows, polygons, ellipses, rectangles
- Export file or viewport to clipboard or as TIFF, JPEG, PNG, EMF, BMP, CGM, PDF, PostScript, SVG, DWG/DXF, PPT, or as a MOVIE
- List CGM elements, to analyse file
- Print with APS, using SDI's superior Print GUI
- Unicode multilingual character set support. Add Latin and non-Latin text languages, such as Cyrillic, Polish, Arabic, Indic, etc.

Drawing/Editing Toolbar

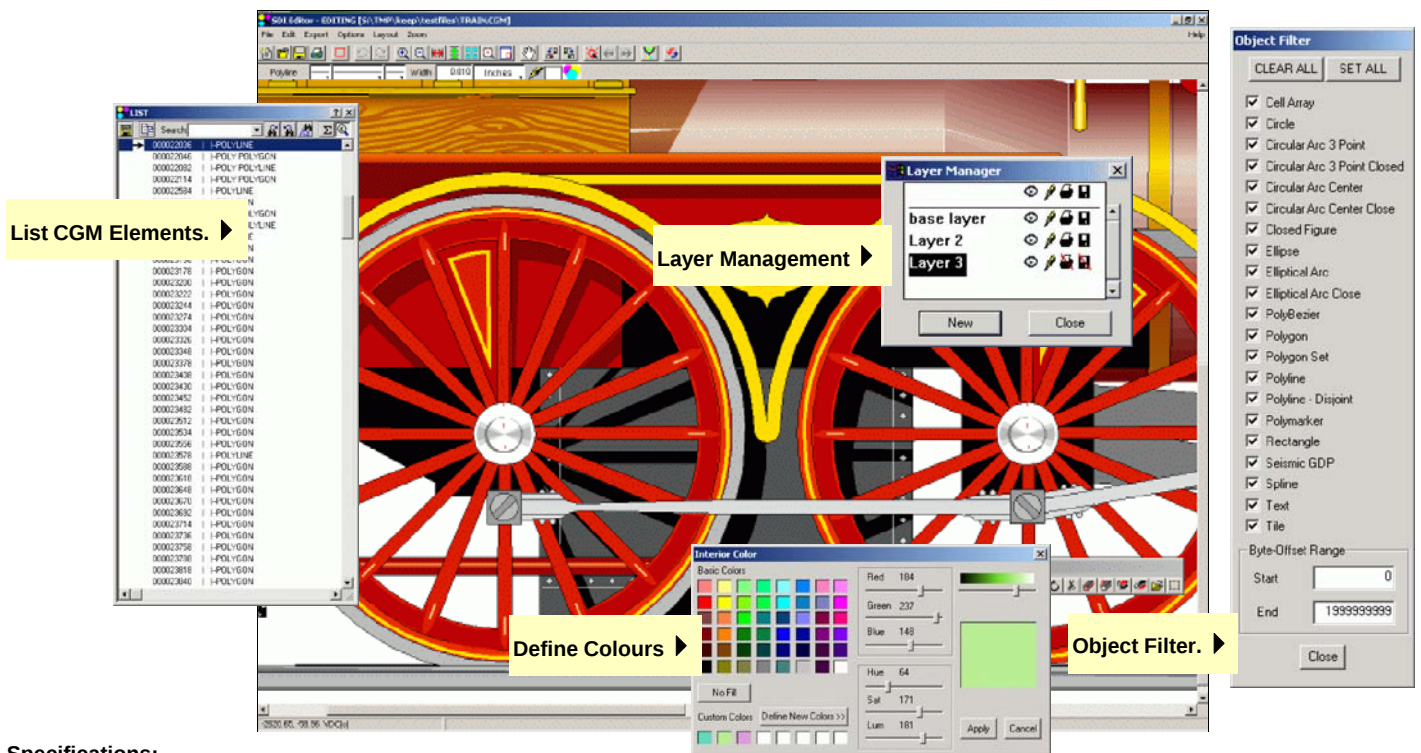

- | | | |
|----------------------|----------------------------|----------------------------------|
| 1. Select Object | 9. Place Bezier Line | 17. Move Object to Front |
| 2. Place Text | 10. Place Polygon | 18. Move Object to Back |
| 3. Place Boxed Text | 11. Place Ellipse | 19. Move Object One Level Up |
| 4. Place Leader Line | 12. Place Rectangle | 20. Move Object One Level Back |
| 5. Place Line | 13. Place Symbol | 21. Insert Graphic (Add files) |
| 6. Place Polyline | 14. Create/Modify Hot Spot | 22. Select Group (Group editing) |
| 7. Place Arc | 15. Rotate Object | |
| 8. Place Sweep Arrow | 16. Delete Object | |

Standard Toolbar

- | | | |
|--------------------------------|-------------------|-------------------|
| 1. New Drawing | 9. Zoom Out | 17. Rotate Right |
| 2. Open | 10. Fit to Width | 18. Show Hotspots |
| 3. Save | 11. Fit to Height | 19. Back |
| 4. Print the file | 12. Best Fit | 20. Forward |
| 5. Select a viewport to export | 13. Detail View | 21. Object Filter |
| 6. Undo | 14. Overview | 22. Refresh |
| 7. Redo | 15. Pan Mode | |
| 8. Zoom In | 16. Rotate Left | |

Specifications:

Certification:	NIST certified ATA
Versions Supported:	CGM versions 1, 2, 3 and 4
CGM Profiles:	ATA, CALS, J-2008 and WebCGM
Operating Environments:	MS Windows NT 4.0, 2000, XP
Standard Input Formats:	CGM Profiles: CGM ATA and CALS; BMP, CALS, EMF/WMF, HPGL, ICO, JPEG, PDF, PNG, PS, TIFF and XWD
Standard Output Formats:	CGM Profiles: CGM ATA and CALS; TIFF, JPEG, PNG, EMF and BMP.
