

# DGN Utilities

## A MicroStation “Plug-in” for Graphics Export/Import

SDI’s DGN Utilities are ideal for MicroStation environments that need to publish technical drawings in the CGM format.

MicroStation users will benefit from SDI’s seamless “MDL” integration of Import/Export options from CGM Version 1-4. SDI’s DGN Utilities translate graphic primitives to high level MicroStation elements while maintaining file integrity and efficient files sizes.

Line tables for “style and weight” are supported. Fonts are automatically stroked or mapped to your choice of 52 CGM font styles. Mapped fonts are scaled to maintain text alignment.

SDI’s DGN Utilities are a “must have” for any tech pubs group that needs to publish “CGM-ATA” compliant drawings.

## CGM Export Features

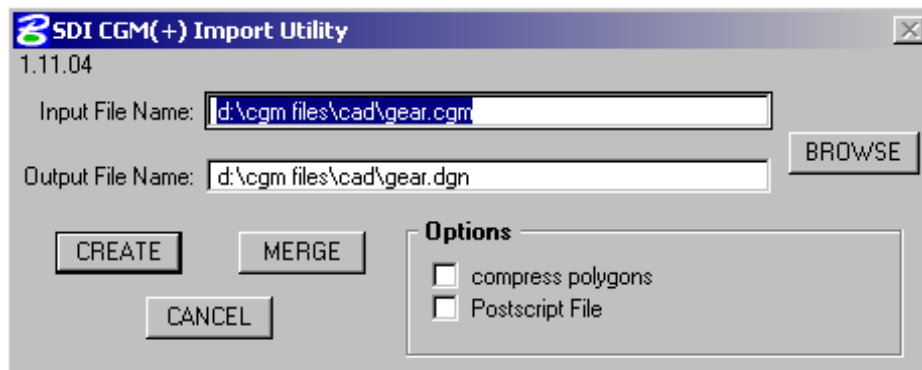

*Bentley MicroStation - DGN Export Utilities*

- Export “Hot Spot” drawings as CGM version 4.
- Export Raster files as “tiled” CGM version 3.
- Export all “Reference” files (Raster & Vector) as a single CGM file.
- Integrate your plot server (SDI or Zeh) with SDI Export.
- Level Priority Table support for accurate printing & plotting.
- Polygon fills: MicroStation Fill, Level Fill, & Level Priority.

## CGM Import Features

Import CGM files from CATIA, Pro-E, UGS, I-DEAS

*Bentley MicroStation - DGN Import Utilities*

- Automatic color table mapping.
- Supports Create and Import design file options.
- Scale CGM for Fence X, Y, XY, or No Fence.
- Font mapping of CGM and ATA fonts to MicroStation fonts.
