

Panther View

Panther View is a preview tool that allows users to view, pan, rotate and zoom CGM files in the preview pane of Windows File Explorer.

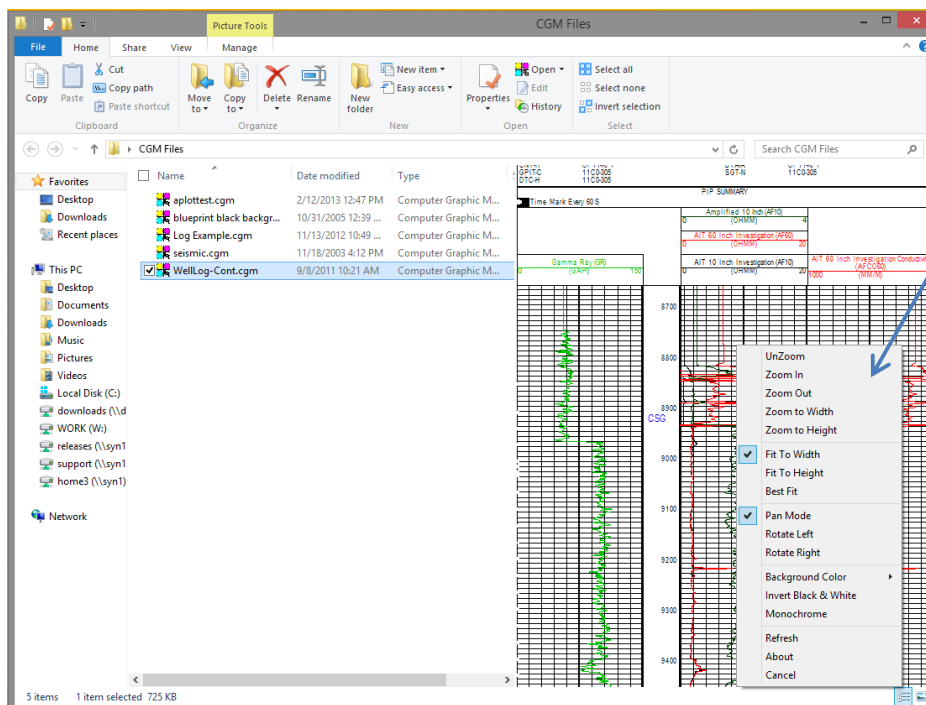

Getting Started

Once Panther View is installed, follow the steps below to view CGM Graphics in Windows Explorer.

1. Open a Windows Explorer window
2. Under the View tab, select Preview pane
3. After setting the preview pane, select a CGM file on your Windows File Explorer window, the preview pane will show the CGM file on the right side

Options

Right-click on the preview pane to view available options and interact with the CGM file
