# SDI Panther

Sharing Made Easy

SDI Panther products enable users to quickly and easily print or create PDF files and PowerPoint™ presentations from multiple documents.

Our tools make sharing information efficient, faster and easier. Every product of the Panther family supports CGM, PDF, EMF, PostScript, DWG/DXF, AI, TIFF, JPEG, PNG, GIF, HTML, TXT , RTF and Microsoft Word™ file formats.

All the applications include Panther View, a preview tool that allows users to view, pan and zoom CGM files in the preview pane of Windows Explorer.
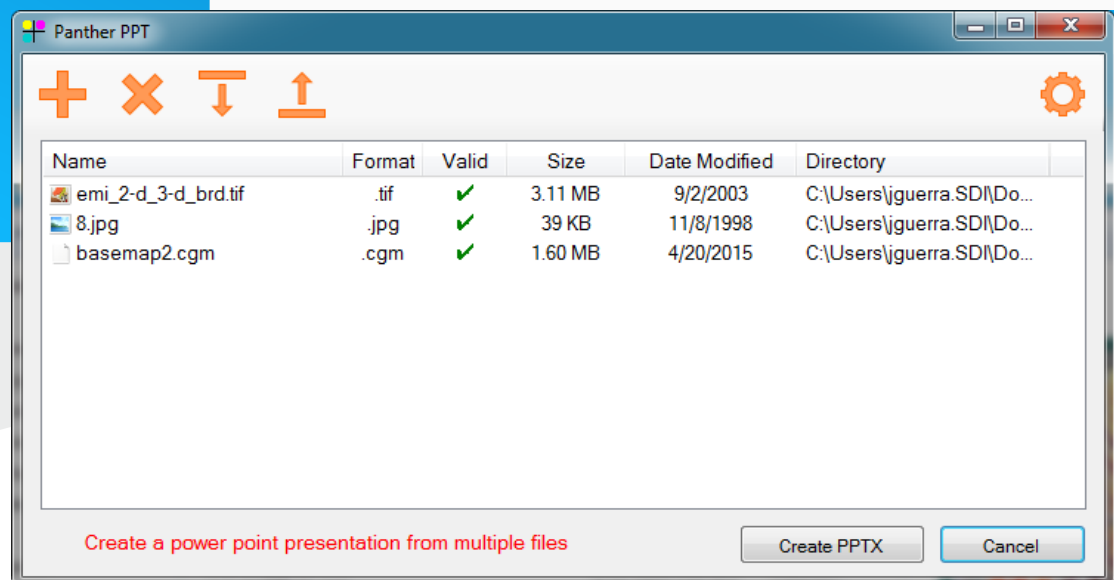

Meet Panther PPT

Panther PPT allows users to create PowerPoint™ presentations –slide-by-slide—from a variety of graphic file types in a few easy steps. Simply select the files in Windows Explorer and then either right-click and select Panther PPT or drag & drop to the interface window. Users can then add, re-order or delete files prior to creating the PPT output.

In Panther PPT, users can also change the size of the slides. The graphics will maintain their proportions and simply scale to the desired size.

Benefits of Panther PPT

- Superior output quality.

- Faster than inserting screen captures.

- Multi-page documents automatically create a multi-slide sequence.

- Simply drag and drop to desktop icon or right-click file in Explorer.

- Panther PPT supports slide templates.

- Low cost, individual, site or corporate licensing.

Meet Panther PDF

Panther PDF simplifies the process of sharing information by quickly and easily combining data, regardless of the graphics format, into a single multi-page PDF. Simply select a group of files in Windows Explorer and either right-click or drag and drop to the desktop icon. The input data can be single or multi-page, 2D or 3D files and can be added to, re-ordered or deleted before creating the PDF output.

Benefits of Panther PDF

- Converts multiple formats in one step.
- Combines all documents into a single PDF.
- Vector data is retained for optimum quality.
- Low cost individual, site or corporate licensing.

Panther PDF

Name	Format	Valid	Size	Date Modified	Directory
seistst.cgm	.cgm	✔	179 KB	2/9/2001	C:\Users\jguerra.SDI\Docum
DAY-1-4800-5500-LST.emf	.emf	✔	4.20 MB	10/2/2002	C:\Users\jguerra.SDI\Docum

Meet Panther Print

Panther Print provides the most effective means of producing high quality output on desktop and wide format printers.

An intuitive dialog box provides thumbnail view depicting orientation and scaling relative to selected page or roll size for true WYSIWYG output that reduces waste. Patented APS roll size support for wide format printers eliminates inconvenient and time consuming setup of custom page sizes.

Benefits of Panther Print

- Simplified user interface.
- Thumbnail view saves time and media.
- Output can be scaled and rotated.
- Roll size support avoids inconvenience of creating custom page sizes.
- Supports long plots (500+ ft / 150+ m)
- Export options creates CGM, PDF and EMF output.
- Removes gaps from multi-page PDF well logs.

Requirements

Operating System: Windows 7, 8/8.1, 10, 32 & 64-bit versions.
