

# CGM Reader

## View CGM JPEG PNG TIFF XWD CALS with Internet Explorer

SDI's CGM Reader is an Active/X plug-in viewer for Microsoft's Internet Explorer browser. CGM Reader gives users of GeoQuest, Landmark, Paradigm, and other Geo Applications the ability to view maps, seismic sections, and well logs in their native CGM format. In fact, CGM is a W3C approved MIME format and the CGM format has a new extension WebCGM. This means publishing and distributing your Geo data via your company's intranet is easier, faster, retains scale and visual integrity.

CGM Reader also views popular image formats like CALS, JPEG, PNG, TIFF, & XWD files, so your Geo users can standardize on a single graphic plug-in viewer for their browser.

### CGM Reader supports IE thru' 8.x

#### Viewing Formats

CGM v1-v3
